SHARES

*The following is an excerpt from Nourished Planet: Sustainability in the Global Food System (<https://islandpress.org/books/nourished-planet>), published by Island Press in June of 2018. Nourished Planet (<https://foodtank.com/news/2018/05/nourished-planet-sustainability-in-the-global-food-system/>) was edited by Danielle Nierenberg, president of Food Tank, and produced with support from the Barilla Center for Food & Nutrition.*

Agriculture is the base of food systems. In the view of Alexander Müller (<https://foodtank.com/news/2018/05/alexander-muller-teebagrifood-planet-people-health/>), study leader of The Economics of Ecosystems and Biodiversity in Agriculture and Food (TEEBAgriFood) (<https://foodtank.com/news/2018/06/teebagrifood-revealing>
